Connectivity & Support: Ethernet/LAN troubleshooting, network tracing, VPN, user access, software troubleshooting, issue escalation and documentation

Organization & Security: IT asset tracking, Jira ticketing, equipment provisioning, onboarding/offboarding, secure access practices

PROFESSIONAL EXPERIENCE

Axiom Technology | Support Desktop Engineer Jul 2026 – Present

- Provide time-sensitive desktop and application support in healthcare offices to help staff maintain access to essential systems.
- Troubleshoot technical issues on-site and document findings for the team lead and follow-up support.

StandardAero | Information Technology Intern Jan 2026 – Aug 2026

- Configured, imaged, and deployed employee workstations and laptops; supported equipment provisioning and new-user workstation setup.
- Troubleshot monitors, printers, peripherals, software, authentication, and wired/network connectivity issues across departments.
- Tracked IT assets and service incidents in Jira; documented fixes and performed network mapping and cable/connectivity tracing.
- Assisted onboarding and offboarding with equipment and account access, including Active Directory and multifactor authentication.

Branford Quality Finishing | Secretary / IT Assistant Jan 2016 – Sep 2022

- Supported desktop computers, macOS systems, printers, business applications, and connected equipment in a 10-person office and warehouse.
- Handled computer wipes, endpoint maintenance, onboarding/offboarding tasks, and connectivity troubleshooting.
- Built and maintained a print server supporting 10 offline devices.

HANDS-ON HOME INFRASTRUCTURE LAB

- Built and maintained an Ubuntu home server and managed Ethernet switch environment, connecting network devices and testing LAN connectivity.
- Installed and organized server/network hardware and cabling; diagnosed physical connections and network accessibility issues.
- Deployed and maintained Docker and Nextcloud services, validating device access and troubleshooting service connectivity.
